## Fancy making over your apartment with some contemporary design? Of course you do.

Design Days Dubai is back for its fifth edition, bringing design pieces from some of the world's most established and emerging galleries.

International exhibitors – Brazil, Spain and France are all represented – will be at The Venue in Downtown Dubai from 14th-18th March.

While it's a globally important event, Design Days Dubai will definitely be flying the flag for the UAE, with local names – innovative Dubai automotive artists of M.A.D Gallery are taking part for the first time – and competitions to draw out a brand-new generation of UAE-based designers.

Everything on show is available to buy and there'll also be workshops, projects, talks and guided tours so visitors can discover more about what's on display and there's no buying blind.

Looking for design legends in the making? Design Days Dubai has an unusual way of showcasing artists' works.

Cyril Zammit, director of Design Days Dubai, said: "We have a unique format which positions young emerging galleries alongside the renowned, providing a first-time opportunity to exhibit at an international level; and for design enthusiasts, the opportunity to meet designers from all over the world and acquire collectible design not seen anywhere else."
